

ASHLEY SHIN

ashley.shin@nih.gov ◇ ashleyhshin@gmail.com ◇ www.ashleyshin.org

Interests: information retrieval, bioNLP, AI for medicine, scholarly document processing, NLP, ML, ethics, HCI

EDUCATION

B.A. in Philosophy University of California, Santa Barbara 2022

Relevant Coursework: Data Structures, Algorithms, Discrete Math, Linear Algebra, Real Analysis, Symbolic Logic, Topology; Ethics, Philosophy of Language, Philosophy of Science, Metaphysics.

EXPERIENCE

National Library of Medicine (NLM), NIH *Bethesda, MD*
Research Fellow Sep 2022 - Present

- Worked with Dr. Qiao Jin and Dr. Zhiyong Lu in bioNLP group, NCBI/NLM/NIH
- Research spanning biomedical natural language processing (bioNLP), information retrieval, machine learning
- Research aimed at improving PubMed, a biomedical search engine used by 7 million researchers

HONORS

NSF Graduate Fellowship CSGrad4US, 2023 cohort. Selected based on demonstrated potential in pursuing a doctorate in a CISE field. \$159k in total funding upon enrollment in PhD program.

Top 3, BioASQ Challenge¹ 2023 Represented NCBI/NLM at BioASQ, document retrieval subtask. First postbac fellow to lead NLM team at BioASQ. Past NLM participants were postdocs and staff scientists.

4th place, UCSB ACM-ICPC 2022 Regional algorithmic programming contest.

2nd place, Stanford ProCo 2015 Algorithmic programming contest in the style of ACM-ICPC.

PROJECTS

Similar Articles Project Preprocessed PubMed user query-click logs to train a BERT-based model for binary token classification: given a seed article and a "similar article" recommended by PubMed, determine which tokens in the article title to highlight for user convenience. Superior performance over common baselines in internal tests – F_1 of 82.8 (ours) versus word2vec (55.5), SBERT(65.9). *Pytorch, Hugging Face*. Led to [1]

Multi-Stage Document Retrieval System Implemented system that uses a bi-encoder for retrieval and a cross-encoder model for reranking. Both models initialized with BERT and further trained on query-article search logs of unprecedented scale, with 255M query-article pairs, each consisting of a user query and a document clicked by the user. *Pytorch, Hugging Face, FAISS, Numpy, Pandas*. Led to [2]

Pubmed Log-Augmented Sparse Retriever Implemented log-augmented sparse retrieval baseline with BM25 as part of LADER ablation study. 35M documents indexed/searched. *Pyserini/Lucene, Numpy, Pandas*. Led to [3]

Transformers for PPG/ECG data Built attention models and novel contrastive learning objectives specifically for extremely long PPG/ECG waveform sequences. *Pytorch, Hugging Face, Scikit-Learn, Numpy, Pandas*

¹BioASQ Biomedical Semantic Question Answering Challenge. Past participants include Google Research, UCSD, U. Mass.

BearMaps Wrote the backend for a Google Maps-like web application, with scrolling and zoom in/out for the city of Berkeley, CA. Implemented fastest route with K-D trees and A* Search Algorithm. *Java, Apache Maven, Junit*

Gitlet Working version of Git, with basic functions such as init, commit, push, branch, checkout, merge, etc. *Java*

SKILLS

Languages Python, Java, C++, JavaScript

Libraries Pytorch, Hugging Face Transformers, FAISS, Numpy, Pandas

Tools LaTeX, Git, Vim, CUDA

SERVICE

Translator

2012 - 2022

Translated/interpreted from Korean to English and vice versa for:

- North Korean refugees seeking permanent residency at U.S. Citizenship and Immigration Services (USCIS) in San Francisco
- Korean American adoptees searching for their birth parents in Korea
- Korean small business owners in business meetings with clients and investors
- Korean immigrants' legal documents, in process of applying for visas and citizenships

Korean American communities

2012 - 2023

From beginning of high school to last year of college, was always active in the local Korean community organizations such as Korean Student Association (KSA). In various roles including President and event coordinator, I have:

- organized fundraisers for supporting Korean language classes at local high schools
- helped organize a large-scale fundraiser, "Korean Night," at a Major League Baseball game (Oakland A's)
- created news letters on Korean culture to the local community.
